EXPERIENCE

• Rio Tinto Exploration

Technology Specialist (LIBS) (acting) Jan. 2025 – Present

- Manage operation of LIBS core-scanning device, including prioritisation of scanned material based on business requirements.
- QAQC and analysis of LIBS data, as well as writing python scripts for improved processing and analysis.

Geodata Scientist II

Jan. 2023 – Dec. 2024

- Deployed machine learning model pipelines for production environments using Docker and AWS.
- Scaled-up internal R&D projects, which unlocked new capabilities in geophysical, geochemical, and mineralogical modelling for target generation and prioritization.
- Full-stack development of various data science apps, including automating CI/CD routines using GitHub Actions, integrating Databricks, and contributed to Python libraries for company-wide knowledge share.
- Helped manage a Posit Connect server with over 100 users from the regional exploration teams.

Geodata Scientist I

Aug. 2021 – Dec. 2022

- Implemented machine learning methods for ore-body knowledge and target generation in global exploration contexts using Python and R.
- Automated GIS workflows using ArcPy and wrote custom Excel macros using VBA, saving hours of manual work per month.
- Produced and maintained multiple internal and external data science apps, built using Dash, Streamlit, and R Shiny.

Vacation Student, Geophysics

Nov. 2020 – Aug. 2021

- Completed routine analysis of geophysical, geochemical, and petrophysical data for target generation in the Mt Isa and Pilbara regions.
- Compiled both project and state-wide data sets across Australia.
- Supervised airborne and ground geophysical surveys undertaken by geophysical contractors.

• The University of Queensland

Tutor, School of Mathematics and Physics

Jul. 2017 – Nov. 2020

- Tutored a wide range of introductory and advanced courses to specialist and non-specialist students. Select courses include DATA7202 "Statistical Methods for Data Science", STAT3006 "Statistical Learning", and STAT3500 "Problems and Applications in Modern Statistics".

EDUCATION

• The University of Western Australia

Graduate Certificate in Data Science

Jul. 2022 – Sep. 2023

• The University of Queensland

Bachelor of Science (Honours) in Exploration Geophysics

Feb. 2019 – Nov. 2020

Bachelor of Mathematics / Science in Statistics and Geological Sciences (Extended)

Feb. 2014 – Nov. 2018

CONFERENCE PRESENTATIONS

- Presented "Building an integrated geochemistry interpretation app for the Paterson Province" with Dr Michael Whitbread (Rio Tinto Exploration), *International Applied Geochemistry Symposium 2024*, Adelaide, Australia, October 2024.
- Co-facilitated the Datarock "Applied data science for geologists" pre-conference two-day workshop, *International Applied Geochemistry Symposium 2024*, Adelaide, Australia, October 2024.

SKILLS

- **Programming:** Python, R, $\text{\LaTeX}$, SQL.
- **Software:** AWS, Docker, Git, GitHub Actions, Jira, Databricks, Jira/Confluence, Posit Connect, Linux.
- **Geoscientific software:** Oasis Montaj, ioGas, ModelVision, Geoscience Analyst, ArcGIS Pro (including ArcPy).
