EXPERIENCE

• Rio Tinto Exploration

Geoscientist III Perth, Australia. Aug. 2026 – Present

- Act as both LIBS and Geophysics Data SME, helping to design and integrate new in-house tools for data accessibility and interoperability in both cloud tools and desktop applications across the entire exploration pipeline.

Technology Specialist III (Acting) Perth, Australia. Jan. 2025 – Jul. 2026

- Managed operation of LIBS core-scanning device and assisted management of on-site laboratory.
- Used ioGAS and python to perform QAQC and analysis of LIBS-derived mineralogy and chemistry data, for use-cases in ore-body knowledge, exploration vectoring, and pre-feasibility studies for future Rio Tinto mines.
- Lead and trained staff (in Australia and Rwanda) on operation of core-scanning device, and analysis of and integration of LIBS results into logging, modelling, and machine learning workflows.
- Automated manual workflows involving skeleton core image segmentation, Raman Spectroscopy QAQC, and ioGAS workflows using python.

Geodata Scientist II Perth, Australia. Jan. 2023 – Dec. 2024

- Deployed machine learning model pipelines for production environments using Docker and AWS.
- Scaled-up internal research and development projects, which unlocked new capabilities in geophysical, geochemical, and mineralogical modelling for target generation and prioritization for the global exploration teams.
- Full-stack development of various data science apps, including automating CI/CD routines, integrating Databricks, and contributing to python libraries for company-wide knowledge share.
- Served as primary point of contact for external data science consultants, resolving day-to-day issues and coordinating communication between teams.

Geodata Scientist I Perth, Australia. Aug. 2021 – Dec. 2022

- Implemented machine learning methods for ore-body knowledge and target generation in global exploration contexts using python and R.
- Created and maintained multiple internal and external data science apps, built using Dash, Streamlit, and R Shiny.

Vacation Student, Geophysics Brisbane, Australia. Nov. 2020 – Aug. 2021

- Completed routine analysis of geophysical, geochemical, and petrophysical data for target generation in the Mt Isa and Pilbara regions of Australia.
- Compiled both project and state-wide geophysical data sets across Australia.
- Supervised airborne and ground geophysical surveys undertaken by geophysical contractors.

• The University of Queensland

Tutor, School of Mathematics and Physics Brisbane, Australia. Jul. 2017 – Nov. 2020

- Tutored a wide range of introductory and advanced courses to specialist and non-specialist students. Select courses include DATA7202 "Statistical Methods for Data Science", STAT3006 "Statistical Learning", and STAT3500 "Problems and Applications in Modern Statistics".

EDUCATION

• The University of Western Australia

Graduate Certificate in Data Science Jul. 2022 – Sep. 2023

• The University of Queensland

Bachelor of Science (Honours) in Exploration Geophysics Feb. 2019 – Nov. 2020

- Thesis title: Linear inversion of seismic refraction amplitudes for near-surface velocity control.

Bachelor of Mathematics in Statistics, Bachelor of Science in Geological Sciences (Extended) Feb. 2014 – Nov. 2018

PUBLICATIONS

- Button, H. & Whitbread, M. (2024). Building an integrated geochemistry interpretation app for the Paterson Province. Proceedings of the International Applied Geochemistry Symposium Meeting, 14-18 October 2024, Adelaide, Australia. <https://www.appliedgeochemists.org/aag-events/30th-iaag-symposium-2024>

SKILLS

- **Geoscientific software:** Oasis Montaj, ioGas, ModelVision, Geoscience Analyst, ArcGIS Pro (including ArcPy).
- **Programming:** Python, R, L^AT_EX, SQL.
- **Software:** AWS, Docker, Git, GitHub Actions, Databricks, Jira/Confluence, Posit Connect, Linux.

HOBBIES

- Playing and seeing live music; collecting vinyl records; tinkering with computers; stationery; reading manga; yoga.
